## **Message :**

"The long road to Safe Drinking Water in First Nation Communities" article appeared in most recent Canadian Water Treatment magazine. It's time to put a plug and stop the money down the drain by federal government and start to hold Politicians accountable for the abysmal state of drinking water on Canada's reserves!

**In the upcoming election ask your candidates these three questions and make them explain their solutions to your satisfaction, before casting your vote,**

- ***Will you implement national regulations for drinking water quality?***
- ***How will you address INAC's and HC's self-monitoring?***
- ***What is your strategy for creating an independent national regulator for First Nations drinking water?***

We encourage you to exercise your vote, select a candidate who will make safe drinking water a reality for ALL First Nations, choose your Member of Parliament carefully, and once elected hold them accountable to YOU!
