

Lesson 1: Pictures of Pollution Questions for PowerPoint

Slide 2: What is wrong with the water?

- Orange
- Foam
- It is the colour of the rocks and the cement
- It comes from somewhere and will flow into a river or another source of water

Slide 3: What do you see that is polluting the water in this picture?

- Car oil
- Gas
- Car tires
- Garbage
- Algae

Slide 4: Here is a photo of a mine. What can pollute the water here?

- Chemicals in the rocks (that can leak into the water)
- Residue from machines
- Residue from mine activities (for example, explosions)
- Leakage from the area

What do you notice about the colour of the water?

- Multicoloured (orange, green, yellow, brown)

Slide 5: There are two types of pollution in this photo, what are they?

- Water pollution and air pollution

Make a list of things you may be able to find in the water

- Dead animals and fish
- Garbage
- Sewer water
- Chemicals

Slide 6: This is a photo of rain water flowing from the drain. If rain water is clear, why is this water gray?

- Water collects garbage when it flows in the streets

Slide 7: Water in the sink is "CLEAN" drinking water for a city.

What is wrong with this water? Would you drink this water?

Slide 8: What can be the cause of pollution in this source of water? It's a lake.

- Oil and gas from boats
- Garbage
- Sewer water
- Runoff

Slide 9: Is the water in this photo clean? Would you drink it directly from the source of water? Is it possible that the water is polluted?
