

Waterborne Diseases Questions (High School)

1. Which disease are you researching? What is the scientific name for the disease-causing organism?
2. What type of organism causes this disease?
3. Draw the organism and its life cycle.
4. What are the symptoms of this disease? Can it be spread from person to person? How long do the symptoms last? Can it be treated? If there are no medicinal treatments available, what can an infected person do to recover?
